RECHARGEABLE 4X4 ADVENTURE LIGHT LED

December 2011

ARB's 12 volt 4x4 adventure lights are designed to be tough, compact and lightweight so you can use them anywhere, anytime reliable lighting is required. With both a fluorescent tube and an LED model already a proven success, ARB now has a tough, new rechargeable LED variant available.

Supplied with a 12V DC cigarette lighter adaptor charge lead and a 240V/300mA AC charger/adaptor, the new rechargeable LED adventure light incorporates a convenient cordless rechargeable battery with a running time of up to 4.5 hours. As well as this, sixty individual LED lights each have a life expectancy of 50,000 hours to provide optimal, long term brightness that is perfect for roadside repairs, camping and in the workshop.

A versatile hook mount has been integrated into the top of the adventure light making it perfect for around the campsite, while dual magnetic mounts allows the light to be attached to steel surfaces such as the side of your vehicle for hands-free operation during night-time repairs. Shock and water resistant, the rechargeable LED adventure light incorporates an in-line power switch and soft rubberised handle.

The rechargeable LED comes packed in a high visibility, durable canvas storage bag that holds both the light and its charging adaptors and leads so they are always close at hand. All ARB 4x4 Adventure Lights come with a comprehensive 2 year warranty. Sold exclusively by ARB, the adventure light range is available at selected ARB stores and stockists throughout the country.
