ARB BULL BARS FOR NEW MODEL VEHICLES

February 2014

Following the release of a number of new model 4WDs in the past few months, ARB has developed customised bull bars for the Jeep Grand Cherokee, Holden Colorado 7 and the Nissan Y62 Patrol.

Delivering formidable frontal protection, all ARB deluxe bull bars feature ARB's renowned multi fold upswept and tapered wing design for optimum strength and approach angle. Suitable for winch and non-winch applications, all bars will accommodate Warn, Magnum, Bushranger or Smittybilt low mount model electric winches. Air bag compatible, all bars are finished in a durable powder coat with the option to colour code, and come standard with twin Hi-Lift jacking points as well as provision to mount two aerials and ARB Intensity LED or IPF driving lights. The latest releases for the Grand Cherokee, Colorado 7 and Y62 Patrol all feature extensive under bar protection panels on the centre and either side, perfect for off road travel.

Jeep Grand Cherokee

Designed and developed from the ground up, the deluxe bar for 2011 to 2013 Jeep Grand Cherokee 4x4 models is made to fit all engine and model variations within the WK2 Grand Cherokee model range. With the release of the 2014 Jeep Grand Cherokee this year, ARB engineers also customised a new bar to suit the latest model's bumper profile, headlights and parking sensor location. An extensive test program undertaken for both deluxe bars has ensured maximum strength, durability and an improved approach angle ideal for touring, climbing and general off road travel.

Holden Colorado 7

While visually similar to the Holden Colorado ute released in 2012, the different Colorado 7 bumper profile meant further development for the ARB engineering team. Including the same features incorporated into the Colorado ute deluxe bar, the Colorado 7 bar comes complete with a top pan winch cover panel and centre and under wing protection panels to protect vital underbody components, whilst also assisting in maximum approach angle. With provision to mount aerials and driving lights, the deluxe bar equips the Colorado 7 perfectly for Outback touring.

All ARB deluxe bull bars feature ARB's renowned multi fold upswept and tapered wing design for optimum strength and approach angle.

Nissan Y62 Patrol deluxe bull bar

Nissan Y62 Patrol

With ARB deluxe and Sahara bars already developed for the overseas Y62 model in 2010, ARB needed only to adapt this model to the 2013 Australian specific Y62. Further bar design was required to incorporate Nissan's Forward Collision Warning System (radar), parking sensors, camera and headlight washers, with ARB's engineers successfully incorporating these features into the Australian specific bar. The bar incorporates provision for an electric winch for non-radar equipped models, while the fully engineered mounting system caters for the vehicle's airbag functionality. Under bar protection panels help to prevent damage to vital undercarriage components caused by rocks and debris, and provision for the forward facing camera (if fitted) is also accommodated. Finished in a satin black powder coat with the option to colour code, the deluxe bull bar is ideal for off road and daily use, giving the Y62 a sleek and sophisticated look.

A variety of additional products for the Jeep Grand Cherokee, Holden Colorado 7 and Nissan Y62 Patrol are also available from ARB, including OME suspension, Outback Solutions drawer systems, Safari snorkels and much more.
