ARB’S TANGO STORAGE SOLUTION FOR DUAL CABS

For dual cab utility owners looking for an alternative to a traditional canopy, ARB has released a new Tango load system.
Made up of three main components; the Tango Sport Lid, Tango mount system and Tango Loadmaster cargo organiser, the new load system provides additional practicality, versatility and security to the standard vehicle tub.

TANGO SPORT LID
The crowning jewel of the new Tango load system is the stylish and practical Tango Sport Lid. Providing secure storage space and protection from the elements, as well as incorporating a clever new hinge system that allows the fitment of OE sport bars, the Tango Sport Lid attaches to the Tango mount rails to provide an integrated system. The clever attachment system allows for quick and easy installation and removal of the Tango Sport Lid, to cater for larger loads or when complete access to the tub is required.

The unique hinge system enables factory sport bars to be fitted, without compromising access to the cargo space or interfering with the vehicle cabin when raised.

Aluminium T-channels on the top surface of the Tango Sport Lid enable the fitment of Thule and Rhino roof bars and accessories to further increase storage space and practicality.

The Tango Sport Lid also incorporates central locking via the vehicle key fob, as well as an emergency key should the vehicle battery fail.

TANGO MOUNT SYSTEM
At the heart of ARB’s new Tango system are the cleverly designed mounting rails. The extruded aluminium rails bolt directly to the inside-edge of the tub using the existing mounting holes, and with no drilling required.

By attaching over the top edge of the tub sides, the mount system also provides protection in an area that’s often easily damaged during loading and unloading.

Adding to its versatility, the side rails also incorporate a T-channel within the top face. This is designed to be compatible with a range of Thule & Rhino accessories such as cross bars, cargo trays, bike carriers and more, which can be used to provide additional storage space.
LOADMASTER CARGO ORGANISER

Separating contents and preventing cargo from sliding around are two inherent challenges that exist when packing a ute tub. Providing a solution to both of these challenges, is the Tango Loadmaster cargo organiser.

Suitable for use with all vehicle specific Tango mount systems, the Tango Loadmaster simply slides into the mount rails on each side of the vehicle tub. This can then be used to partition the area and separate cargo in line with the owner’s specific requirements.

An extending frame and flexible hinges on each end of the Tango Loadmaster allows for both parallel and angled positioning of the barrier, while two built-in pockets provide additional storage for smaller items.

ARB’s new Tango load system is now available for the current Toyota Hilux, Ford Ranger & Nissan Navara NP300, with more models under development.
