### Summit Bull Bar

Utilising 60.3mm outer frame and cross bar tubing, as well as an extensive use of press forming in the construction, the Toyota HiLux Summit bull bar has been designed with a relentless pursuit of quality. The bar uses a split pan design for maximum strength and airflow as well as under wing protection panels to protect the vulnerable lower parts of the Hilux. The bar is able to accommodate a range of low mount electric winches, up to 10,000lb, and includes twin Hi-Lift jack points to assist with difficult recovery situations. Provision for ARB Intensity LED and IPF driving lights are integrated into the top pan of the bar, while a redesigned fog light surround and ARB LED indicator/clearance light assembly is included as standard.

### Side Rails and Steps

Side rails and protection steps integrate with the Toyota HiLux Summit bull bar, offering protection to vulnerable quarter and door panels. The patented side rail attachment system provides uncompromised strength while the all-new, clear anodised tread plate provides easy ingress/egress to the vehicle in all weather conditions. A stand alone protection step is also available for the HiLux.

### Rear Step Tow Bar

The all new Summit rear step tow bar for the HiLux is a class leading rear protection and tow system designed to appear as original vehicle equipment in finish and integration. The through tub mounting system attaches to the chassis to provide exceptional levels of strength. A 50mm, 3.5t tow hitch enables heavy trailers, caravans or boats to be connected with ease, while also allowing the use of a hitch mounted recovery point. A lift up cover panel conceals trailer electrics, with the option to fit an ARB air compressor outlet, rear camera connection and a 50amp Anderson plug.

### Classic Canopy

Complementing the design of the vehicle and its high sided tub, the ARB Classic canopy is now available in standard height configuration with either a smooth or textured exterior finish for the HiLux. The canopy is available with either sliding or lift up windows, which are positioned low on the canopy shell to provide easy access into the back of the vehicle. As part of the fitment process, additional tailgate seals are added to the rear corners of the vehicle tub in order to minimise water and dust ingress through the tailgate. The rear door is fitted with a high mount LED stop lamp, a forward facing interior light and specially selected gas assist struts with a low opening force for ease of use. ARB canopy shells are made from a special co-extruded ABS plastic for strength and durability. A number

of roof rack options and other accessories are also available.

### Ascent Canopy

Individually styled to suit new HiLux, the Ascent canopy combines tried and proven ARB engineering with innovative features designed to meet current and future expectations. Features unique to the Ascent canopy range include the addition of remote central locking via the vehicle key, electronic unlatching of side lift up and rear windows, a standard roof vent for reducing dust ingress and an over rail attachment system which results in a more integrated appearance. The electronic unlatching, combined with frameless windows, provides easy one-handed operation and removes the need for locking hardware on the exterior of the side window glass. A choice of frameless lift-up or pop-out windows are available, providing flexibility to meet individual load requirements and a number of roof rack options and other accessories are available.

### Air Lockers

Designed and manufactured in Australia, ARB Air Lockers will enhance the traction of the HiLux in just about any terrain. With a state-of-the-art two piece

---

design, forged gears for the ultimate in strength and durability, and an industry-leading five year warranty, ARB Air Lockers combine quality engineering with unrivalled aftersales support.

**Also Available:**

In addition to the above, the following list of products for the Toyota HiLux are available throughout ARB stores and stockists across Australia.

**About ARB**

Founded in 1975 in Melbourne, ARB 4x4 Accessories is now Australia's largest manufacturer and distributor of aftermarket 4WD accessories. With products including bull bars, protection equipment, Old Man Emu suspension, Air Lockers, roof racks, canopies and recovery equipment, our primary mission is to prepare vehicles for the remote and harsh conditions typically encountered off road. ARB currently has more than 50 stores and over 100 stockists located across Australia, as well as offices in the United States, Thailand and Europe, and an export network reaching more than a hundred countries around the world.
