

# ARB product range continues to grow for the Ford PXII Ranger

Since the release of the Ford Ranger PX MK2 in 2015, ARB Corporation Ltd, a world leader in aftermarket 4x4 accessories, has been working tirelessly to build an outstanding accessory range to complement the vehicle. Designed and engineered with strength and practicality in mind, ARB's range of gear includes front, rear, side and under body protection as well as the Ascent canopy, Air Lockers and more.

### Alloy Bull Bar

Three grades of aluminium alloy are utilised in the construction of the ARB Alloy bull bar, each specifically selected for maximum corrosion resistance and high fatigue strength. Through contemporary styling, the Alloy bar complement's the Ranger design by achieving a fully integrated appearance with the use of clean design cues and wide centre grille section. 4mm aluminium alloy is used for the outer wings and centre pan for maximum strength, whilst 60mm alloy outer tubing provides the fresh characteristic of the bar. ARB's renowned steel mounting system and press forming system contributes to the overall strength of the Alloy bull bar. The Alloy bar can be fitted with winches with up to 10,000lbs capacity. As an optional accessory ARB Fog Lights can be fitted for improved vision in inclement conditions.

### Summit Bull Bar

Utilising 60.3mm outer frame and cross bar tubing, as well as an extensive use of press forming in the construction, the Summit bull bar for the Ranger has been designed with a relentless pursuit of quality. The bar uses a split pan design for maximum strength and airflow as well as under wing protection panels to protect the vulnerable lower parts of the Ranger. The bar is able to accommodate a range of low mount electric winches, up to 10,000lb, and includes twin Hi-Lift jack points to assist with difficult recovery situations. Provision for ARB Intensity LED and IPF driving lights are integrated into the top pan of the bar, while a redesigned fog light surround and ARB LED indicator/clearance light assembly is included as standard.

### Summit Side Rails and Steps

Side rails and protection steps integrate with the Summit bull bar, offering protection to vulnerable

quarter and door panels. The patented side rail attachment system provides uncompromised strength while the all-new, clear anodised tread plate provides easy entry and exit to the vehicle in all weather conditions. A stand alone protection step is also available for the Ranger.

### Summit Rear Step Tow Bar

The all new Summit rear step tow bar for the PX Ranger is a class leading rear protection and tow system designed to appear as original vehicle equipment in finish and integration. The through-tub mounting system attaches to the chassis to provide exceptional levels of strength. A 50mm, 3.5t tow hitch enables heavy trailers, caravans or boats to be connected with ease, while also allowing the use of a hitch mounted recovery point. A lift up cover panel conceals trailer electrics, with the option to fit an ARB air compressor outlet, rear camera connection and a 50amp Anderson plug.

### Ascent Canopy

Individually styled to suit the new Ranger, the Ascent canopy combines tried and proven ARB engineering with innovative features designed to meet current and future expectations. Features unique to the Ascent canopy range include the addition of remote central locking via the vehicle key, electronic unlatching of side lift up and rear windows, a standard roof vent for reducing dust ingress and an over rail attachment system which results in a more integrated appearance. The electronic unlatching, combined with frameless windows, provides easy one-handed operation and removes the need for locking hardware on the exterior of the side window glass. Providing flexibility, a choice of frameless lift-up or pop-out windows are available. A number of roof rack options and other accessories are available to meet individual load requirements.

## ARB Frontier Long Range Fuel Tank

The ARB Frontier fuel tank is roto-moulded to follow the underbody contours of the new Ranger, allowing for increased capacity and extended fuel range. The tank is specially formulated from cross-linked polymer which is impact resistant, flexible and UV stable. The one piece construction eliminates seams or welds in the body of the tank, and at a 7-9mm wall thickness, the strength of the tank is uncompromising.

## ARB Sportguard Ute Liner

The new ARB Sportguard for the Ranger contains a clever new five piece design that simply snaps together with no drilling required, making the installation process straightforward. The anti-slip floor ensures all materials placed on the tray of the Ranger remain stationary whilst in transit. The multi-piece tub liner is cleverly designed to minimise wasted load space by following the contour of the original tray and by retaining the original factory load tie down points. The ARB Sportguard incorporates a gutter channel in the floor design which directs unwanted liquid from the tray to the tailgate area, where it can easily drain away. The tailgate piece with Sportguard is a "cap off" design, engineered to complement the under rail design of the ute liner.

## Air Lockers

Designed and manufactured in Australia, ARB Air Lockers will enhance the traction of the PXII Ranger in just about any terrain. With a state-of-the-art two piece design, forged gears for the ultimate in strength and durability, and an industry-leading five year warranty, ARB Air Lockers combine quality equipment with a reliable backing.

## Also Available:

In addition to the above, the following list of products for the PXII Ranger are available throughout ARB stores and stockists across Australia.

ARB Intensity LED Lights  
ARB Recovery points  
ARB Under vehicle protection  
ARB Classic Canopy  
Deluxe Bull bar  
Safari snorkel  
Outback solutions drawers  
SmartBar front protection  
ARB Sport Lid  
Hayman Reese towbar

Old Man Emu Suspension systems, including  
Nitrocharger Sport Shock Absorbers  
OME BP51 shock absorbers  
IPF Driving Lights  
Auxiliary battery tray  
Long Ranger fuel tank  
Recaro seats  
Clearview towing mirrors

## Coming Soon:

In addition to the above, the Sahara bar for the PXII Ranger will also be available soon, throughout ARB stores and stockists across Australia.
